

April 15, 2026

Dear ABC Supply,

Due to continued volatility in the aluminum market and broader macroeconomic pressures, aluminum-related costs have continued to increase since our February price announcement.

These conditions, including sustained inflationary pressure, evolving trade policy, and ongoing supply-chain constraints, continue to drive higher raw material and logistics costs. Despite our ongoing efforts to contain these cost implications, these sustained increases can no longer be fully absorbed.

Prices will increase **15% across all Kaycan Aluminum products, effective on all shipments May 15, 2026.**

If you have any questions, please contact Nicole Juchniewicz nicole.juchniewicz@saint-gobain.com.

We understand that price increases create real challenges, and we do not take this change lightly. We appreciate your continued partnership and will do everything we can to support you through this transition.

Sincerely,

Thomas Yeager

Vice President, Product Management
