

PRICE INCREASE NOTICE

July 8, 2026

To our valued customers,

Over the past several months, we have experienced sustained cost escalation across key inputs that directly impact our manufactured products. Most notably, domestic steel markets—particularly cold rolled coil, Galvalume, and galvanized substrates—have moved meaningfully higher, with continued volatility and upward pressure on availability.

In parallel, coating systems and paint inputs have seen consistent inflation driven by raw material cost increases and tight supply conditions. These pressures are further compounded by elevated freight and logistics costs, which remain well above historical norms and continue to trend upward across both inbound and outbound lanes.

While we have taken deliberate actions to offset these increases through operational efficiencies and productivity improvements, the magnitude and persistence of these cost drivers now require us to make a market-aligned adjustment to our pricing.

As a result, we are issuing a **price increase of up to 6%** effective August 10, 2026

New pricing will take effect on all orders received after end of business August 7, 2026. You will receive an updated price list that reflects these changes. We trust this approach will allow for adequate material planning and order placement for the best possible pricing with the shortest lead times available across our network. Orders placed prior to the effective increase date must ship by August 21, 2026.

We are aware that market fluctuations may be disruptive, and we are committed to keeping you apprised of any information related to steel costs.

Please know we appreciate your business and partnership on every project and thank you for your understanding. If you have any questions or concerns, please do not hesitate to contact us.
