

Dear Valued Customers,

March 20th, 2026

As many of you have likely seen, aluminum prices continue to trend upward due to ongoing global market conditions. Factors such as increased energy costs, supply chain constraints, and evolving trade policies are continuing to impact the cost of raw materials across the industry. Since our last price increase announcement in December, aluminum prices have risen by approximately 21%.

In response to these sustained increases, we will be implementing a price adjustment of 6–12% on our aluminum and copper manufactured goods. This change will take effect on all orders placed on or after May 1, 2026.

Please note that pricing for gutter coil and trim coil will continue to be reviewed monthly and adjusted as necessary to reflect market conditions. We remain committed to maintaining transparency and providing timely updates as changes occur.

We understand that price adjustments can be challenging, and we truly appreciate your continued partnership and understanding. Our team remains focused on delivering high-quality products, reliable service, and consistent value to support your business.

Thank you for your continued trust—your success is our success.
