Re: **Price Increase**

Dear Valued Customer,

Midway continues to experience cost increases, most notably in our raw materials and labor rates that cannot be offset with our gains in manufacturing efficiency.

Midway will have an overall multiplier price increase of 4 % to 9 % across our entire product lines. The multiplier price increase will go into effect on orders placed on and after February 23rd, 2026. The Midway quote system will be adjusted accordingly to reflect the changes.

We truly appreciate your support and understanding.

Jack Anderson
