Dear Valued Customer,

We appreciate your continued partnership and the trust you place in M&M Manufacturing and Snappy.

As you know, the broader economic environment continues to present challenges, particularly related to material costs and supply chain pressures. The cost of aluminum has risen significantly due to a combination of global inflation and tariff-related impacts. As a result, we will be implementing a price adjustment on our Alumiflex product line, effective May 11, 2025.

This change reflects our ongoing commitment to product quality, service reliability, and long-term supply chain stability. While this adjustment currently applies only to Alumiflex, we are actively monitoring cost trends across all raw materials and transportation inputs, and we may need to make similar adjustments to other product lines in the near future.

Your sales representative will be reaching out to you directly with your updated pricing and to discuss any questions you may have. Our goal is to be as transparent and supportive as possible during this process.
