

BCMP BULLETIN

2026 Price Revision

Date: May 1, 2026

To: Bay Cities Metal Products Customers

Re: Price Revision Effective June 1, 2026

Effective June 1, 2026, Bay Cities Metal Products will be implementing a 5% price increase on all steel products and a 10% increase on all aluminum and copper products.

Persistent increases in raw material costs have placed mounting pressure on our operations. Despite our ongoing efforts to manage this internally, we have reached a point where a price adjustment is necessary to maintain the level of quality and service our customers depend on.

To ensure fair and consistent supply during this period, we may limit order quantities to historical purchase levels. We remain committed to being a reliable partner and will continue working to deliver the best possible value.

We are grateful for your continued business. If you have any questions, please contact your sales representative or a member of our Customer Success team.

Thank you,

Ben Hanfling
