

March 9, 2026

Dear Valued Business Partner,

Despite our continued efforts to offset rising material and operational costs, recent increases have reached a point where an adjustment to our pricing is necessary. As a result, OmniMax will implement **up to a 15% price increase on aluminum products** and a **12% increase on copper**.

We have taken great care to minimize the impact on our customers; however, passing along a portion of these unavoidable costs is essential to maintaining the quality, service, and reliability you expect from OmniMax.

These new prices will apply to all orders placed **on or after April 13, 2026**.

Maintaining consistent service and meeting customer demand remain priorities. To ensure fair and responsible allocation of supply during this period, we may limit order quantities to historical purchase levels.

If you have any questions, please contact your local sales representative or our customer care team. We sincerely appreciate your understanding and your continued partnership.

Regards,

Kirk Stinson
