

# PRICING BULLETIN

## July 2025 Price Adjustment - US

We are writing to provide advance notice of price adjustments that will take effect on **July 21, 2025**.

We continue to experience rising supply chain costs driven by a range of inflationary pressures, including raw material increases, evolving trade and tariff policies, and broader geopolitical developments affecting the global supply chain.

As a result, the following price adjustments will be implemented **July 21, 2025**. While the scope of this increase is currently limited to the products listed below, we are closely monitoring the recent tariff increases on steel and aluminum imports under Section 232. These changes could lead to additional increases on plates, fasteners, and other metal accessories. We will do our best to communicate any additional price adjustments as quickly as possible.

Product	Price Adjustment July 21, 2025
Polyiso Insulation	Up to 5%
Vapor Barriers	Up to 15%

All orders will continue to be invoiced at the price that is valid at the time of shipment, regardless of the date the order was placed. All active quotes will be honored through quote expiration. New quotes issued with quote validity past July 21 will reflect the price increase.

Updated membrane/polyiso price lists and accessory price books will be distributed in advance of the increase.

We appreciate your continued support of Carlisle SynTec Systems. If you have any questions regarding this announcement, please contact your Regional Manager.

Sincerely,

Mark Long – Vice President, Commercial Roofing Sales
