

# Price Adjustment Effective May 4th

**Dear Valued Customer,**

We hope this message finds you well. We are writing to inform you of an upcoming adjustment to our pricing, effective May 4th 2026.

Like many businesses in our industry, ES Windows LLC has been significantly impacted by rising costs across our entire supply chain. Specifically, we have experienced substantial price increases from our suppliers in the following areas:

- **Aluminum products** — affected by newly imposed tariffs on imported aluminum materials
- **Glass** — increased production and raw material costs
- **Paint and finishing materials** — driven by rising oil-based input costs
- **Transportation and logistics** — directly impacted by fluctuating oil prices

Despite our best efforts to absorb these costs and maintain our current pricing for as long as possible, the cumulative impact has made it necessary for us to implement a price adjustment.

**Effective May 4th, all products and orders will reflect an overall increase of approximately 7%.**

We want to assure you that this decision was not made lightly. Our commitment to delivering high-quality windows and doors at a fair and competitive price remains unchanged. We continue to work closely with our suppliers to minimize cost pressures wherever possible and will always communicate any future changes with as much advance notice as we can.

We truly value your business and partnership, and we appreciate your understanding during these challenging times.

If you have any questions or would like to discuss your upcoming orders, please do not hesitate to contact us.

Sincerely,

**ES Windows LLC**
