RE: Notice of Inflationary Price Increase

IPS continues to monitor the impact of world events on key business input costs, including fuel surcharges and many key raw material price increases. With the spike in costs proving and projected to have more than a short-term impact, we are announcing a price increase on most items effective May 15<sup>th</sup>, 2026. New pricing will be e-mailed to customers starting April 20<sup>th</sup>, 2026.

The current FFA will remain unchanged at \$1750. Please contact your local sales rep with any questions regarding the new pricing.

We appreciate your continued support of our industry trusted products:
