## K2 Price Change Notification Q1 2026

Dear Valued Partners,

As you are likely aware, current economic conditions, including rising inflation have led to increased costs across global commodity markets over the past several months. While K2 Systems has worked diligently to absorb these increases and minimize the impact on our partners, continuing to do so is no longer sustainable. As a result, we will be implementing pricing adjustments. An updated price list, which will also include newly added products, will be distributed to all partners within the next 30 days.

In the coming weeks, SPA agreements will be reviewed and adjusted as needed. These agreements will continue to be managed by your local Regional Sales Manager, with timing and adjustments handled on an individual account basis.

We will continue to closely monitor commodity markets, energy prices, and freight costs in our ongoing efforts to remain competitive. As always, we are committed to providing a minimum of 30 days' notice prior to any future pricing changes, and we will communicate any pricing decreases should market conditions allow.

Thank you for your continued partnership. We remain focused on delivering innovative products, maintaining product availability, and providing exceptional customer service.

If you have any questions or need additional information, please contact your local territory sales manager.

Sincerely,

K2 Systems
