As diesel prices continue to rise, freight surcharges will also be adjusted. The pre-paid freight threshold for coatings orders will increase from \$12,500 to \$15,000. If you are interested in arranging your own logistics, please contact your local sales representative, who can assist with the transition process.

The new pricing is effective for purchase orders received after April 5, 2026. Project quotes will be honored through their listed expiration date. You may contact your Regional or National Sales Manager with questions.

Thank you for your continued support of SOPREMA.

Sincerely,

Tim Kersey
