August 11, 2025

Dear Valued Customer,

In recent months, we have experienced significant cost increases driven by tariffs and the Midwest Premium, which have impacted the prices of aluminum, steel, copper, packaging materials and paint. While we have made every effort to absorb the cost of these increases, it has become necessary to implement a price adjustment.

Effective September 2, 2025, US Aluminum will be implementing an increase of 5-8% on all aluminum and copper products. Stainless steel and fastener products will increase 10-12%.

Although we will attempt to fill all orders completely, we do reserve the right to limit bulk purchases prior to the increase based on historical order patterns.

If you have any questions, please contact your local sales representative or give us a call at (800) 877-7026. We will be sending you an updated price catalog on or before September 2nd.

Thanks again for your business and best wishes for a continued safe and successful 2025!

Sincerely,

A handwritten signature in blue ink that reads "Chad Harmon". The signature is fluid and cursive, with the first and last names being more prominent.
