Subject: Notice of Potential Price Adjustment Due to New U.S. Tariffs

To our valued customer,

We are reaching out to inform you of a potential upcoming change that may affect the pricing of some of our products. As you may be aware, the U.S. government has announced new tariffs that are scheduled to take effect in the near future. These tariffs could significantly impact the cost of materials and goods across our industry.

While we are committed to minimizing any disruption and absorbing additional costs where possible, we want to be transparent that a price adjustment may become necessary depending on how the final tariff implementation unfolds.

Effective May 19, 2025 all Veer manufactured products could be subject to an increase of 10%.

We greatly value your continued partnership and will keep you informed every step of the way.

Sincerely,

Mark Hinterlong
