Subject: Price Change Notice

Dear Valued Customer:

At GPI Gutter Products, we constantly work to keep production and other operating costs as low as possible. The actions we have taken include better purchasing of raw materials, improving production efficiency, and reducing overall expenses. These actions have enabled us to maintain consistent and competitive pricing for our 20-year company history, even during periods of high inflation and fluctuating metal markets.

Despite our best efforts, metal prices are on the rise primarily due to potential supply chain disruptions resulting from new tariffs placed on imported metal. Other expenses have risen significantly, including the prices we pay for packaging, pallets, freight, and insurance.

As a result of this continued cost increase, GPI will implement the following price increases on selected products, effective May 5, 2025:

8-10% on all Aluminum Gutter Protection and Accessories

4-8% on all Hangers and Outlets

4-6% on all Screen Products

Orders placed on or after May 5th will receive increased pricing. Customers will be allowed to place orders ahead of the increase and will be shipped immediately when the product becomes available. GPI may limit order quantities if they are outside of your normal historical ordering pattern.

We will send updated price lists via e-mail to each of you within the next two weeks. Thank you for your continued business.

Sincerely,

Randy Bailey
